

Umesh T

Front-End Web Developer

Bangarapet, Karnataka, India

+91 6363470490 | umeshtumesh1412@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Front-End Web Developer with hands-on experience designing, developing, testing, and maintaining responsive, user-friendly web applications using HTML5, CSS3, JavaScript, Python, and Django. Skilled in semantic HTML, mobile-first responsive design, DOM manipulation, REST API integration, cross-browser compatibility, web accessibility, debugging, and performance optimization. Built and deployed 4+ production web applications, improving page load times and user experience while collaborating with cross-functional development teams in an Agile environment.

Technical Skills

Programming Languages: HTML5, CSS3, JavaScript (ES6+), Python

Frameworks & APIs: Django, REST API, JSON, AJAX

Front-End Development: Semantic HTML5, Responsive & Mobile-First Web Design, DOM Manipulation, Cross-Browser Compatibility, Web Accessibility (WCAG), UI/UX Implementation

Tools & Platforms: Git, GitHub, GitHub Pages, Visual Studio Code, Browser Developer Tools, Version Control

Core Strengths: Front-End Development, Website Optimization, Debugging, Agile Collaboration, Problem Solving, Team Collaboration, Communication, Time Management

Professional Experience

Graduate Apprentice – Front-End Web Developer

Aug 2025 – Present

Bharat Electronics Limited (BEL), Bengaluru

- Developed responsive, mobile-first web interfaces using semantic HTML5, CSS3, and JavaScript, improving page load speed across internal departmental portals.
- Designed and built 5+ reusable front-end UI components, reducing development time for new internal pages.
- Improved cross-browser compatibility and front-end performance, using browser developer tools to resolve 15+ UI and functionality bugs across Chrome, Firefox, and Edge.
- Built and deployed an internal navigation portal with 16 department-facing modules, streamlining access to NS-2 department resources for 50+ employees.
- Collaborated with cross-functional development teams in an Agile workflow, using Git and GitHub for version control and code reviews across multiple web projects.

Projects

Application of Data Analytics for Campus Event Management System

- Developed a Django-based web application using Python, HTML5, CSS3, JavaScript, and REST API integration.
- Built analytics dashboards and event reporting features, improving event tracking efficiency for 100+ student records.

SKYVAULT – Weather Application

- Built a responsive weather forecasting application using HTML5, CSS3, JavaScript, and the Open-Meteo REST API, featuring real-time city search, forecast, humidity, UV index, wind speed, and visibility data.

Radar and Fire Control System Department Website – BEL

- Developed a departmental website using HTML5, CSS3, and JavaScript with an animated, responsive UI, improving navigation and load performance across desktop and mobile devices.

Personal Portfolio Website

- Designed and developed a fully responsive portfolio website using HTML5, CSS3, and JavaScript, deployed via GitHub Pages with 100% mobile compatibility.

Education

Bachelor of Engineering (B.E.), Information Science and Engineering

2025

CMR Institute of Technology – CGPA: 7.93

Diploma in Computer Science and Engineering

2020

Bharath Polytechnic – Percentage: 76.72%

Relevant Coursework: Web Technologies, Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Software Engineering

Certifications

Infosys Data Analyst Program | Google Cloud Fundamentals | Cryptography
